PROJECTS

Personal Portfolio Website *ReactJs, ExpressJs, NodeJs, Bootstrap*

<https://www.hsharma.social/>

A personal portfolio website, created to show personal projects and create a platform to act as a digital resume to showcase creativity and programming skills. Moreover, providing an easy way to contact and visit other social media platforms.

The Game Of Focus *Java*

<https://github.com/king-knight-harsh/comp2005-fall21-group4>

The computerized version of the board game called "Domination", with the capability to save and load the game, playing alone with computer bots with 2 different difficulty settings and 3 different colour options to accommodate people with colour blindness.

Electronic Webstore *ReactJs, ExpressJs, MongoDB, NodeJs, Stripe, Recharts*

<https://github.com/king-knight-harsh/sbtelecom-webstore>

Ecommerce website, created for the S.B. Telecom(a small electronic store in India) using MERN stack to showcase the product and categories to increase the reach and sales for the company and make the inventory management easier and faster using the Admin Dashboard. The website allows the company to receive payment using the Stripe payment API.

OneStopAgro *Python, Tensorflow, Keras, Scikit-learn, Html, Css, Javascript, Bootstrap*

<https://github.com/king-knight-harsh/OneStopAgro>

The project was created for HackFrostNL 2.0 and provides the solution to the problem of food waste through 3 simple platforms: an AI-based crop disease detector, a discussion portal and a marketplace to sell food products directly to the consumers.
